

New Standard Features in the SP Oven Series

Easy to remove service panels and fan clean out door make for access for service components.

Access door to the fan blade allows for easy cleaning and maintenance of the fan blade. (an extra fan blade is included)

Magnetic proximity door switch has no moving parts and never needs cleaning.

2 interior lights with teflon coating prevent shattering.

4 hinges on each of the meat doors add extra strength.

The shock relay safety switch instantly turns off the motor if anything jams the drive system.

New indirect fan system keeps the motor cooler and eliminates motor failure due to out of balance, dirty fan blades.

Digital controls and a rotisserie advance foot switch, also a two speed convection fan, with a low speed for holding cycle.

Automatic drive chain tensioner maintains proper tension on the chain at all times.
